INTRODUCTION

MEDLINE® is the National Library of Medicine's (NLM) database of indexed journal citations and abstracts published in the United States and more than 80 other countries. Available for online searching since 1971, MEDLINE includes references to articles indexed from 1950 to the present. Citations in MEDLINE are assigned MeSH® Terms and Publication Types from NLM's controlled vocabulary. MEDLINE citations and abstracts are available as the primary component of NLM's PubMed® database, which is searchable via the Internet both directly and through the NLM Gateway.

The subject scope of MEDLINE is biomedicine and health, broadly defined to encompass those areas of the life sciences, behavioral sciences, chemical sciences, and bioengineering needed by health professionals and others engaged in basic research and clinical care, public health, health policy development, or related educational activities. The majority of the publications covered in MEDLINE are scholarly journals; a small number of newspapers, magazines, and newsletters considered useful to particular segments of NLM's broad user community are also included.

The majority of journals are selected for MEDLINE with the advice and guidance of the Literature Selection Technical Review Committee (LSTRC), which meets three times each year. The LSTRC is an NIH-chartered Advisory Committee composed of fifteen authorities such as physicians, researchers, educators, editors, health sciences librarians and historians knowledgeable in biomedicine and the life sciences.

Additional serials are selected by external organizations with which NLM has special collaborative arrangements. These titles are indicated by the symbol "[C]". The majority of these were selected in the past; few are added this way now. These titles complement the *Index Medicus*® titles that are recommended by LSTRC. *Index Medicus* ceased hardcopy publication with the December 2004 issue, but continues to be a virtual subset for MEDLINE in PubMed®.

The symbol "s)" is used before titles that are indexed selectively, i.e., indexed only for articles relating to the fields of biomedicine and life sciences. The symbol "*" identifies titles indexed in *Abridged Index Medicus*, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journals."

The 5,164 journals being indexed for MEDLINE as of January 2007 are listed in four sections:

- (1) Alphabetic listing by abbreviated title, followed by full title;
- (2) Alphabetic listing by full title, followed by abbreviated title;
- (3) Alphabetic listing by subject field; and
- (4) Alphabetic listing by country of publication.

In addition, there are three introductory sections which list titles that have been newly selected for indexing during the past year, titles that have undergone a title change during the past year, and titles that are no longer indexed because they either ceased publication or were deselected as titles to be indexed for MEDLINE.

NEW IN 2007

The ending period and the general material designation (GMD) no longer display in the full title.

For example: an entry in the 2006 LJ of BMC bioinformatics [electronic resource]. currently displays as: BMC bioinformatics

As of 2007, MEDLINE extends back beyond 1966 to 1950 because NLM mapped the original indexing of most OLDMEDLINE citations to current MeSH.

SUBJECT HEADINGS

All subject headings used are from the most recent edition of NLM's controlled vocabulary, Medical Subject Headings (MeSH). The appropriate medical specialty is used as a descriptor whenever possible rather than an organ or disease term. That is, Dermatology is used as a subject heading for *Journal of Cutaneous Pathology* rather than Skin or Skin Diseases. When a specific heading applies to only one or two titles, a more general heading is assigned.

One heading has been changed in the 2007 edition of this publication. All titles previously listed under Nutrition are now listed under the heading Nutritional Sciences.

FILING ORDER

Entries in the title abbreviation and full title sections are sorted letter by letter. Numbers sort before letters. Special characters are ignored, except for the "&", which sorts before numbers.

ABBREVIATIONS OF TITLES

The title abbreviations appearing in the *List of Journals Indexed for MEDLINE* are constructed using the *List of Title Word Abbreviations (LTWA)*. The LTWA is maintained by the ISSN (International Standard Serial Number) International Centre. For more information about the Centre and its LTWA, please consult the ISSN Web site at <http://www.issn.org>.

INTERNATIONAL STANDARD SERIAL NUMBER

The International Standard Serial Number (ISSN) is a serial identifier consisting of a unique seven-digit number and an eighth check digit. The ISSN uniquely identifies a serial title, regardless of language, and is therefore useful in international information exchange and in machine storage of serials data. The ISSN is assigned to a serial title by the appropriate national center of the ISSN Network, which is coordinated by the ISSN International Centre in Paris. The National Serials Data Program (NSDP) of the Library of Congress is the United States Center of the ISSN Network. The ISSN is irrevocably linked to the key title of the serial. If the title of a continuing serial changes, a new ISSN must be assigned to the new title. If a title is published in both print and electronic format, there should be a separate ISSN for each format. In the *List of Journals Indexed for MEDLINE*, the ISSN is printed on the third line of the entry, and the format corresponding to each ISSN is designated by a parenthetical (P) for “print” or (E) for “electronic” following the number. More information about the ISSN is available at <http://www.issn.org>.

DATES OF PUBLICATION

The dates of publication appear on the left-hand side of the last line of the entry. These data contain the years of the first issue for titles currently published and the first and last years for titles that have ceased publication or have been superseded or continued by another title. Unknown years are indicated with a “?”. The dates given are publication dates, and do not necessarily represent NLM’s holdings or issues indexed for MEDLINE.

PERMANENT PAPER NOTICE

Entries for indexed journals known to be printed on acid-free paper contain the designation ‘Acid-Free’. The Acid-free notice appears to the left of the NLM unique identifier.

To report other MEDLINE journals printed on acid-free paper, contact: Head, Preservation and Collection Management Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, MD 20894. To obtain information about permanent paper and how to indicate its use, see the latest edition of American National Standard ANSI/NISO Z39.48, “Permanence of Paper for Publications and Documents in Libraries and Archives” at <http://www.niso.org/>.

NLM UNIQUE IDENTIFIER

The NLM unique identifier consists of either a number with up to nine digits or an eight-digit number followed by an alphabetic character. It is used by medical libraries in reporting serial holdings data to DOCLINE Serial Holdings (formerly called SERHOLD®), NLM’s database of machine-readable holdings statements for serial titles held by U.S., Canadian, and Mexican biomedical libraries. The unique identifier appears at the bottom right corner of each entry. In PubMed, this number is labeled as “JID” in the MEDLINE display format and as “NLM ID” in the Entrez Journals database (<http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=Journals>).

When requesting serial interlibrary loans from the National Library of Medicine, please include the NLM call number (or On Order or In Process notation) and the NLM unique identifier. Holdings information indicating what issues of a title NLM owns and the NLM call number can be found in NLM’s online catalog, LocatorPlus, at <http://locatorplus.gov>. Indexing coverage and detailed bibliographic records can be found at LocatorPlus and the NLM Catalog, an Entrez database, at <http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?db=nlmcatalog>.

Information about how to order this publication can be found at <http://www.nlm.nih.gov/pubs/pubcat.html>. A PDF version is available at <http://www.nlm.nih.gov/pubs/libprog.html>. Information about journal selection for MEDLINE can be found at <http://www.nlm.nih.gov/pubs/factsheets/jsel.html>. Questions can also be directed to NLM’s Customer Service Desk at custserv@nlm.nih.gov (1-888-356-3656).

TITLES ADDED DURING 2006

The symbol "s" identifies titles which are selectively indexed. Only articles relating to the fields of biomedicine and life sciences are indexed from these journals. The symbol "" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journal."*

TITLE CHANGES DURING 2006

The symbol "s" identifies titles which are selectively indexed. Only articles relating to the fields of biomedicine and life sciences are indexed from these journals. The symbol "" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journal."*

FULL TITLE LISTING

The symbol "s" identifies titles which are selectively indexed. Only articles relating to the fields of biomedicine and life sciences are indexed from these journals. The symbol "" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journal."*

SUBJECT LISTING

The symbol "s" identifies titles which are selectively indexed. Only articles relating to the fields of biomedicine and life sciences are indexed from these journals. The symbol "" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journal."*

GEOGRAPHIC LISTING

The country indicated for each publication represents the country of the current publisher. This means that in some instances the geographic affiliation of a title may not be represented by the place of publication, e.g., the journal of a Japanese association might be published in the Netherlands.

The symbol "s" identifies titles which are selectively indexed. Only articles relating to the fields of biomedicine and life sciences are indexed from these journals. The symbol "" identifies titles indexed in Abridged Index Medicus, which ceased hardcopy publication with the December 1997 issue, but is still available online in NLM's PubMed® database as a search subset limit called "Core clinical journal."*
